

2025 Year-End Assessment

Gupta, Saksham

2025-01-01 – 2025-12-31	Person Number	3603346
Document Status Completed	Job	Software/Platform Engineer I
Evaluated By Mishra, Bibhudendu	Manager	Mishra, Bibhudendu

[Click here to enter the employee rating](#)

Overall Rating	Outstanding
Manager Comments	Saksham has played a key role in enhancing automation and efficiency across DevOps initiatives: To name few of the initiatives: Nginx to Istio Migration: Automated migration of 150+ pipelines, reducing manual effort by 90%. The process now completes in 40–50 minutes with zero errors. Container Governance Cleanup: Achieved 80–90% reduction in manual effort through automation. His contributions have significantly improved operational efficiency and platform stability. Saksham's proactive mindset and technical expertise are truly commendable.

2025 Goals

Goal Name	Automated deployment for 180+ apps for migrating to ISTIO from nginx
Goal Description	migrated over 180+ apps from nginx to istio component with 0 downtime and no manual intervention
Status	Completed
Start Date	2025-01-01
Target Completion Date	2025-12-31
Actual Completion Date	2025-11-06

Goal Name	Base image migration for 150+ apps
Goal Description	global enforced to metlife japan for migrating all apps from using Base images from ACR to now use from JFROG

Status	Completed
Start Date	2025-04-01
Target Completion Date	2025-11-19
Actual Completion Date	2025-11-13

Goal Name	Innovating the project regularly
Goal Description	innovated the project with small and big both changes, impactful and user friendly as well
Status	Completed
Start Date	2025-01-01
Target Completion Date	2025-12-31
Actual Completion Date	2025-11-14

Goal Name	Performed cluster merging to save more than \$7000 per year
Goal Description	Merged SIT and SIT2 cluster under guidance and successfully migrated load without any downtime saving metlife more than \$7000 per year, this process can be used for other projects and hence saving a huge chunk of amount metlife is paying
Status	Completed
Start Date	2025-06-01
Target Completion Date	2025-09-01
Actual Completion Date	2025-11-14

Goal Name	Regular Knowledge sharing - End to End DevOps flow to team
Goal Description	Shared and explained thoroughly about the recent upgrades and changes being applied at architecture level regularly
Status	Completed
Start Date	2025-01-01
Target Completion Date	2025-12-31
Actual Completion Date	2025-11-14

Goal Name	To get in depth knowledge of Azure DevSecOps and infrastructure
-----------	---

Goal Description	Azure Infrastructure in depth knowledge better hands-on experience in performing backend tasks related to DevOps Handling more than 160 microservices flawlessly
Status	Completed
Start Date	2025-01-01
Target Completion Date	2025-12-31
Actual Completion Date	2025-11-06

Goal Name	create automation scripts to perform cleanup
Goal Description	Create automation pipelines for cleaning up the old images and restructure the ACR repository
Status	Completed
Start Date	2025-01-01
Target Completion Date	2025-12-31
Actual Completion Date	2025-11-06

Mishra, Bibhudendu

Goal Achievement & Impact: Describe the 2-3 specific and measurable outcomes that represent the employee's performance toward goals during 2025. Describe the business impact of their efforts. Also include any opportunities and areas for improvement.

Goal Achievement & Impact (2025)

Saksham automated the migration of DEV, SIT, and UAT environments from NGINX to ISTIO, reducing a process that would have taken months manually to under 1 hour through scripted execution, delivering significant efficiency gains.

He developed automation scripts for multiple manual DevOps tasks, reducing effort from 7–8 days to under 30 minutes, improving operational speed and reliability.

Saksham leveraged GenAI tools (GitHub Copilot and prompt engineering) to accelerate delivery of complex and time-critical tasks, improving overall productivity and delivery timelines.

He successfully migrated applications with zero downtime to new EAI codes and namespaces, supported SIT cluster merge activities, and guided new teams during API transitions to ensure smooth handovers.

Business Impact:

These contributions significantly reduced manual effort, accelerated delivery timelines, ensured platform stability with zero downtime, and improved day-to-day operational efficiency.

Opportunities for Improvement:

Take more proactive ownership of cloud governance compliance to ensure metrics consistently meet organizational thresholds.
Remain flexible in handling urgent manual interventions when immediate resolution is required.
Continue identifying opportunities to expand DevOps automation using AI tools to further scale impact.

The How: Describe the 2-3 specific examples that represent how the employee demonstrated the New Frontier Themes and MetLife Values. Include how these actions contributed to their business impact, noting key strengths and any areas for improvement.

Move with Speed & Discipline: Automated complex DevOps processes, significantly reducing manual effort and enabling faster, reliable, zero-downtime migrations.
Think Ahead: Leveraged GenAI tools and automation to accelerate delivery of complex tasks and reduce long-term operational overhead.
Win Together: Collaborated closely with teams to resolve operational issues and proactively shared knowledge to uplift team capability.

Opportunity:
Further strengthen proactive cloud governance compliance and flexibility during urgent manual interventions.

Stakeholder Feedback: What are the key themes stakeholders shared in their feedback about the employee? Include strengths and any areas for improvement.

Stakeholders highlighted Saksham's strong impact through DevOps automation, GenAI usage, and collaboration, which significantly improved efficiency and stability.

Future Performance: What are the two things the employee can do more/less of going forward to increase their performance and business impact?

Think Ahead: Take more proactive ownership of cloud governance and compliance, anticipating risks early and expanding the use of AI-driven DevOps automation to further reduce manual effort and scale impact.
Speed & Discipline: Maintain strong automation focus while remaining flexible in addressing urgent manual interventions when immediate resolution is required, ensuring continuity and trust during critical situations.

Additional Comments: Are there other examples, comments, or messages you'd like to include about the employee?

Saksham delivered exceptional value through high-impact DevOps automation, significantly reducing manual effort, accelerating complex migrations, and enabling stable, zero-downtime operations. He consistently demonstrated strong technical ownership, effective collaboration, and forward-looking use of GenAI tools. Overall, Saksham is a strong asset to the team, with continued opportunity to further scale impact through proactive governance ownership and expanded AI-driven automation.

Gupta, Saksham

Goal Achievement: For each of your goals or key focus areas, describe what you achieved during 2025. Include specific, measurable outcomes of your achievements, including the business impact of your efforts. Include any opportunities and areas for improvement.

- 1) Successfully merged SIT1 and SIT2 cluster without impacting business, saving more than \$7000 / year
- 2) Automated the process of migration of DEV SIT UAT from NGINX to ISTIO, manually it would have taken months to do this, reduced the manual effort to 45 min to 1 hour (script execution time)
- 3) Developed scripts for other manual tasks reducing efforts from 7-8 days to under 30 min tasks
- 4) Leveraged GenAI using GitHub copilot and prompt engineering to expedite and deliver critical and complex tasks within time and much more efficiency
- 5) Collaborated with Team to understand daily issues faced and fixed them for smooth and seamless operations
- 6) Shared knowledge for each new innovation and regular tasks to team mates by scheduling a dedicated call with them and taking queries
- 7) Migrated apps with 0 downtime in new EAI CODES and New namespaces while transferring api's to new teams and guiding new teams throughout
- 8)

The How: Describe how you demonstrated the New Frontier Themes and MetLife Values to achieve your goals. Include 2-3 specific examples, noting your strengths and areas for improvement.

- 1) led from the front and delivered all the time critical DevOps GTO priorities[DevX compliance, Base image migration, ISTIO migration] for 160+ apps, at the same time he also helped other teams to streamline with the standards
- 2) in the past thinking from the financial perspective ,identified 16000+ stale images in ACR and solutioned to clean it up effectively without impacting the business in just 1 week of time from inception
- 3) also successfully delivered all major requirements and making team one of the first to be compliant in all scenarios, despite having a large number of microservices and such tight coupling with other teams
- 4) showing leadership and proactiveness by Not being limited to only my team, always helping other teams like K2, ODM, AppR, policy servicing, Customer Engagement, Claims.

Future Performance: What are the two things you can do more/less of going forward to increase your performance and business impact?

I want to do further automation task and remove manual tasks wherever possible

Worker Comments and Acknowledgement

Signature: Gupta Saksham
